Dear Addis:

I wanted to write you a letter concerning the use of your fossil flour product with our chickens.

As you well know, the chickens were practically eaten up with lice in the summer to such an extent they had lost most of their feathers and practically quit laying.

At your suggestion, we made a dusting box where they could go dust in the fossil flour at will. I am happy to report to you now, they look like a different set of chickens, with most of their feathers grown back and egg production about normal.

I will certainly say that it was very successful in this instance with our chickens and I would recommend it highly for this use.

Yours truly,

COLDWATER CATTLE CO., INC.
