RE: Perma Guard
Fossil Shell Flour

Dear Mr. Bostick:

Thank you for introducing me to Perma Guard Fossil Shell Flour. I have been feeding your product to my show and race horses, stallions, mares, foals and horses in training. We have seen an improvement in their hair coat and their attitude. We feel the attitude is the result of fewer to no flies in the stalls as the product is present in the fecal matter and this prohibits the larva and development of adult flies. We feel it will help eliminate the worm problem in the intestines and stomach. If it will kill insects it stands to reason it would have the same effect on internal parasites in the horse's digestive tract.

Also an important factor to me is that I feel the Fossil Shell Flour helps prevent impaction which will prevent colic.

You may feel free to use my name when discussing your Perma Guard Fossil Shell Flour with anyone interested in using your product.

Sincerely,

A handwritten signature in black ink that reads 'Dan Miller II'. The signature is stylized and includes a small flourish at the end.

Dan Miller II
